Botvids	Business och Administration, Stockholm

KOMPETENSER

CRITICAL THINKING

- ✓ This means that I can make good decisions and do what it takes to solve problems, which also includes analytical skills such as gathering and evaluating information.

CREATIVE THINKING

- ✓ Being creative for me in working life means that I have an imaginative way of solving problems or creating new ways of working. It's about more than just being innovative - so being able to see something that does not exist and make it visible

LAGARBETE

- ✓ Cooperation is the ability to work effectively with others, regardless of different opinions. "Today, working groups can be very different in their views on political issues, working methods and have different personalities", This is extremely important. If you want to go far, you go together in Team.

LEADERSHIP

- ✓ It's about things like education, coaching, guidance and being able to keep track, even in positions that do not include direct leadership, the ability to motivate colleagues is incredibly appreciated.

CUSTOMER SERVICE

- ✓ The customer is KING, the most important thing Many companies have, "Whatever we want or not, we all work with sales today", "This includes the ability to listen, talk, convince and negotiate cooperatives". This is me King.

SALE S

- ✓ It is not just sellers who must be able to sell, or you can say convincing. Even those who do not have a direct sales role, even as developers and testers, must be able to convince others of their ideas and visions. To succeed, skills are required to communicate

COMMUNICATION

- ✓ It is not only in sales situations that an ability to communicate is important. It is at least as important when technical decisions must be made: partly to make good decisions, partly for the members of a team to thrive together. One aspect of communication that is important is being able to tell a story. A good way to practice is to tell about your own career, both in large functions and with interesting details.

CUSTOMIZE ME

- ✓ Developers, testers, business analysts naturally apply most professions, those who have problems with adaptation find it difficult. And the changes often come quickly and unexpectedly. The ability to adapt is extremely important. I see myself as water, you pour me into a glass, I shape myself like a glass.

MOTIVATION COMPETENCE

- ✓ I am very enterprising, persistent, energetic, motivated, results-oriented, initiative-taking and quality-minded. I am also good at seeing all these things in mine with people and am happy to tell this to them to make them grow.

INTERPERSONAL COMPETENCE

- ✓ This is about my social skills. On all my workplaces we worked in team vi was given a task to carry out, a certain project. The better the team is at to cooperate, the better outcome.
